

# HYPRO<sup>®</sup> Closed System Cleanload

Safe, Fast, & Simple Chemical Loading System

## Features & Benefits

- Chemical loading system that is compliant with California Closed System Regulation
- Enclosure accommodates many container sizes and fits up to two 2.5 gallon containers at one time
- Allows operator to re-seal partially used containers with the original chemical container cap
- Easily measure both large and small volumes of chemicals inside enclosure
- CycloRinse system provides premium chemical rinsing and meltdown of flowable powders
- ProClean rinse nozzle allows operator to triple rinse chemical containers and system enclosure without exposure to chemicals or rinsate
- System under vacuum with the use of the HYPRO Eductor so all chemicals and contents of the enclosure are drawn into the stream and system, away from the operator
- Eduction provides proper mixing of chemicals by immediately placing it into a solution concentrate
- 11mm or 16mm eductor orifice sizes for optimized performance
- Simple and intuitive to use with visual and multi-lingual instructions

CycloRinse system provides fast and effective rinsing that is compatible with liquid and dry chemicals.

Simple and intuitive operation for regulation compliance.

Compatible with many container sizes and allows resealing of containers utilizing original caps.
