

Mech-Mixer - Mechanical Tank Agitation

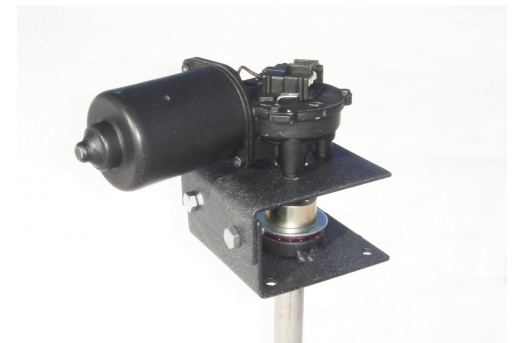

The Mec-Mixer is an electric driven vertical shaft tank agitator ideal for keeping solids or diluted paint mixtures in suspension. It operates quietly on less than 1 amp at 12 volts.

The Mec-Mixer bolts to the top of a tank with stainless steel fasteners. The drive shaft is telescoping to allow fitting to a wide range of tank sizes.

Large horizontal tanks may require two Mec-Mixers depending on the difficulty of material to suspend.

Features:

- Two speed 12volt motor
- Heavy duty worm gear box
- Heavy duty thrust bearing
- Telescoping drive shaft
- Stainless steel shaft and paddles
- Easy installation
