

# DJI AGRAS T30

---

Tried and true. With a multitude elevated features specifically designed for agricultural applications, it's no wonder that the DJI Agras T30 is currently considered the industry leading drone. Below are some of the top features that Rantizo contractors find most beneficial for their operations:

## 30L LIQUID TANK/40L DRY SPREADER TANK

- No frills about it. Maximize payload and cover more ground with each flight.
- Fly & Apply a variety of products. From pesticides, to cover crops, to micronutrients, and more! All with one tool!

## SMART TANK REFILL ALERT

- Part of the new intelligent route mode that independently plans the best route for each operation.
- A gauge indicates the remaining liquid payload amount and estimated time until refill in real-time, letting operators strike the perfect balance between payload and battery life.

## SPHERICAL RADAR OBSTACLE DETECTION

- Highly sophisticated for more reliable obstacle detection and improved safety.
- Perceives obstacles and surroundings while eliminating blind spots in all environments, weather conditions, and viewing angles.

## AUTONOMOUS OBSTACLE AVOIDANCE

- Automatically adapt flights and maneuver around obstacles ensuring safety during operation.

## INTELLIGENT BATTERY SYSTEM

- Faster battery charging and longer battery life improve efficiency per flight while reducing down time.

## SPECS

- 17.9 ACRES PER HOUR (AT 3GPA)
- 16 NOZZLES -- 20' SWATH (AT 7")
- ~3 ACRES PER FLIGHT
- 7-9 MIN. FLIGHT TIME PER BATTERY
- 9-13 MIN. CHARGING TIME (DEPENDENT UPON RETURN-TO-HOME FERRYING)
- RTK HIGH-PRECISION OPERATION
- IP67 DUST AND WATER RESISTANCE
- DUAL FPV CAMERAS
